

What are the key benefits of using ABI systems?

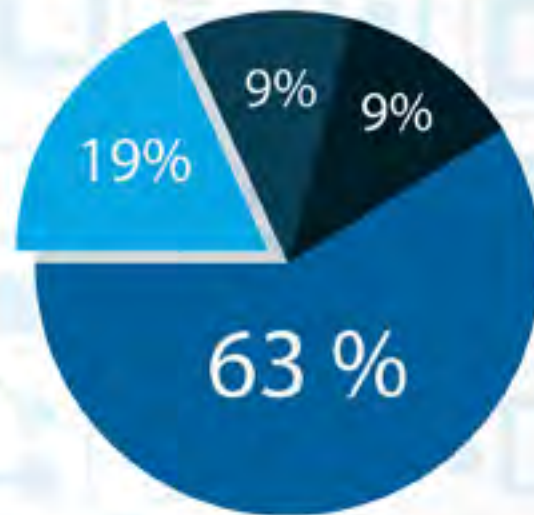

Repair philosophy

Save Test results, work instructions and generate reports

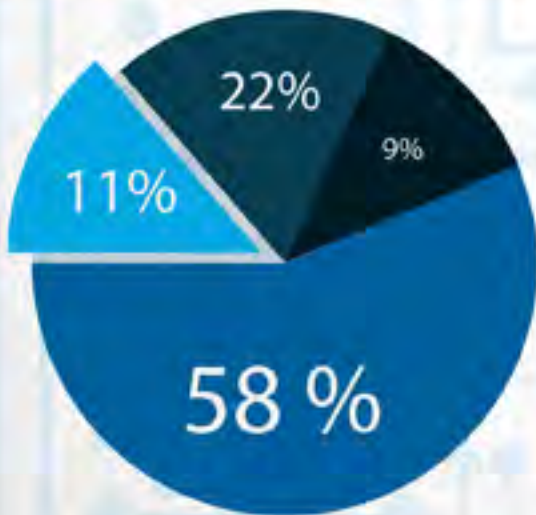

Time reduction

Reduce PCB turnaround, improve operators effectiveness

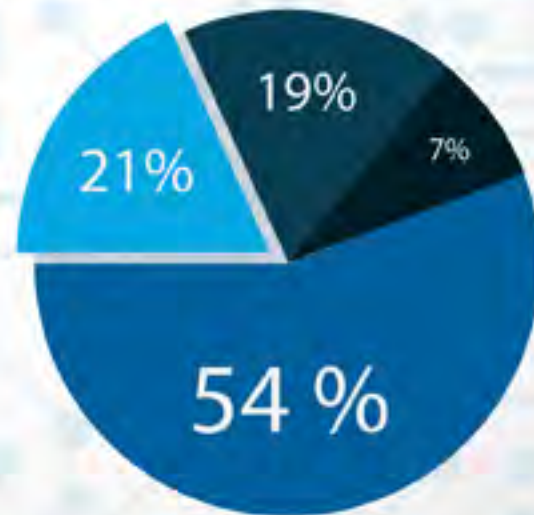

Operation management

Improve staff skills, increase technology understanding

Financial savings

Reduce spare parts inventory and PCB scrappage

This is what our customers have to say.

ABI test and repair systems are available in many workshops across the country, keeping critical military equipment working.

Turkish Army, Turkey

The BoardMaster and RevEng helped us become self-sufficient and increased our systems' reliability. In 5 years we saved over US\$50Million.

Metro Sao Paulo, Brazil

All our plastic injection machines are now repaired in-house thanks to the BoardMaster. We recovered investment in 6 months.

LEGO, Mexico

Our repair reliability is now at 99% and around £500K/year are saved thanks to ABI's BoardMaster.

ThyssenKrupp, UK

The BoardMaster help us when traditional instrumentation cannot. Our success rate is over 80% and is growing!

MVS Medical Systems, Poland

We needed a system that would help us repair similar PCBs used in military applications that's why we selected the BoardMaster and RevEng from ABI!

Al Taif Technical, UAE

Our complex and ageing machines require to operate 24/7. ABI systems allowed us to save a lot of time and money!

PT.INDAH KIAT PULP & PAPER TBK Indonesia

ABI products contribute to our machine obsolescence programme.

Savelys, France

Fast turnaround is required by end customer and is critical to respond in the shortest possible time. We achieved that with ABI products.
