

# CALID-3

Detector CALID-3 was designed for a simple detection and differentiating between 3 major groups of chemical warfare agents G, V and H in a liquid form. Drop of chemical agent creates immediately colour spot on the paper. According to the colour is possible to determine groups of the G, V, and H agents within 30 seconds.

The detector designed as a booklet in different form. It is a typical detector for individual use both in armed forces and for civilians generally. CALID-3 detector represents the world standard in the detection and the distinguishing of the three groups of CWA, known as the 3-WAY.

## SPECIFICATION

<b>Application, Use</b>	
<ul style="list-style-type: none"> <li>Detection of G, H and V agent in liquid form only.</li> <li>Presence of agents is indicated by colour spots appearance.</li> </ul>	
<b>Data</b>	
Sensitivity: N/A	Operation Temperature: -40 °C - +60 °C
Expiry Date: 5 years	Simulation: use the G, V and H simulant for CALID-3.
<b>Design and Construction</b>	
CALID-3	12 sheets of paper containing dyes, adhesive back, perforated in a booklet. The carton cover is printed with instruction (2. page) and three colour standard strips (4. page). NSN 6665-16-000-7966
CALID-3P	25 sheets of paper containing dyes, perforated in a booklet. The carton cover is printed with instruction and three colour standard strips.
Printing in any language and variety in cover design, number of sheets and packing available on request and negotiations.	
Booklet: 65 x 100 mm	Detection sheet (torn): 65 x 85 mm
<b>Packing, Packaging</b>	
Each booklet in a PE bag	
50 booklets in a carton 1,3 kg, 20 cartons (1000 booklets) in a carton transport box 26 kg	
Storage conditions -40°C -+40°C, at 60°C no more than 1 month
